

Communities

Providing broadband Internet access to every citizen in your community doesn't have to be hard. In fact, we can do it in about 90 days.

In the 21st century, universal access to the Internet is as important as rail lines, telephone service and electricity were in the last century. And because Skycasters uses satellite backhaul, there's no community we can't help.

Turnkey solution.

We provide a turnkey solution, with all billing and administration handled by Skycasters. We take care of the credit card transactions with the end user, and your community receives access credits that can be used by police, fire, EMS or governmental offices.

Full interoperability.

The Skycasters Point-to-Multipoint (PTMP) solution is fully compatible with any community distribution architecture. Our PTMP solution works well with fixed (wired) networks as well as wireless. Our hybrid WiMAX solution can cover over 25 square miles. We'll even help you design it.

100% Recyclability.

Even Skycasters' legendary performance is no match for fiber. We know that. But it will be years before fiber comes to every community. When it does, your PTMP infrastructure will be 100% reusable, with Skycasters satellite remaining on site as a backup. Call it obsolescence protection.

Easy and safe.

When the end user accesses the Internet, they are taken first to a secure login and payment page, customized for your community. It takes only a minute to sign up, and no special software is required.

Stimulate your local economy.

Our community programs come with a free community news web site, with free unlimited access for all citizens. You may want to have your local newspaper manage it. Consider letting your local phone company run a VoIP PBX, and the local video rental store co-locate a Video on Demand server.

Customized for you.

Choose the rate plans offered in your community, as well as the access and maintenance credits you will receive. You can even provide pre-paid cards to disadvantaged members of your community, and apply for ARRA stimulus funding to subsidize the costs.

Backed by Skycasters.

We're Skycasters, and we're here 24/7. Our customers rely on us to provide high quality solutions in some of the most remote locations on Earth. Including Hometown, USA.

To learn more about Skycasters or about our flexible, customized service plans, visit skycasters.com or call (330) 785-2100 toll-free (800) 268-8653.
